## **DETAILED ACTION**

### ***Election/Restrictions***

Restriction to one of the following inventions is required under 35 U.S.C. 121:

I. Claims 1-14, drawn to method for forming a fluid ejecting device, classified in class 216, subclass 27.

II. Claims 15-20, drawn to fluid ejecting device and ink jet printhead, classified in class 347, subclass 20.

Inventions I and II are related as process of making and product made. The invention is distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case, this process can be used to make other product such as semiconductor chips.

During a telephone conversation with Manuel Quiogue on May 09, 2002 a provisional election was made with traverse to prosecute the invention of claims 15-20. Affirmation of this election must be made by applicant in replying to this Office action. Claims 1-14 withdrawn from further consideration by the examiner, 37 CFR 1.142(b), as being drawn to a non-elected invention.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

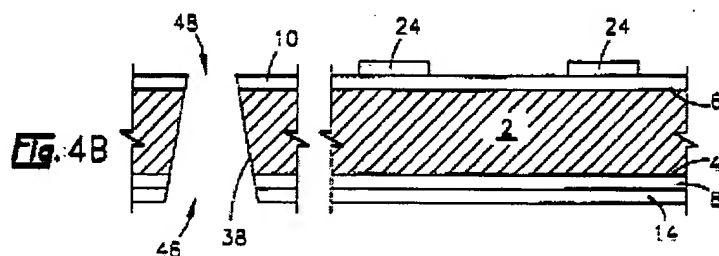

1. Claims 15-20 are rejected under 35 U.S.C. 102(b) as being obvious by Murthy et al. (US 5658471).

Murthy discloses a fluid ejecting device comprising:

a silicon substrate having <100> crystalline orientation (FIG. 4A, element 2, column 3, line 1-3)

a plurality of fluid drop generators (FIG. 4B, element 24) formed on a first surface of said silicon substrate

a fluid feed slot extending from a second surface of said silicon substrate to said first surface (FIG. 4B, element 38)

said fluid slot formed by deep reactive ion etching (column 7, line 32) followed by anisotropic wet etching (column 6, line 13-42), and having an opening at the first surface having a width W1 (FIG. 4B, element 48) that is less than a width W2 (FIG. 4B, element 46) of an opening at the second surface

Art Unit: 2853

**Referring to claims 16 and 18:** W1 is about 100 micrometers or less (column 8, line 45-50)

**Referring to claims 19 and 20:** W12 is about 300 micrometers or less (column 8, line 45-50)
